OSD FAP contracted with Pennsylvania State University for this data collection to assist in understanding the benefits and limitations of using a DoD developed, standardized, evidence-informed home visitation curriculum (i.e., Take Root Home Visitation [TRHV]) within the NPSP. TRHV is a tailorable home visitation curriculum that addresses risk and protective factors for child maltreatment, which is a primary focus of NPSP home visitation. TRHV is designed to be used by home visitors to structure their time with their clients and their families. TRHV helps home visitors actively work with parents to strengthen core parenting skills, improve the parent-child bond, and promote positive child development. During visits, home visitors will use TRHV to collaborate with parents on identifying areas of strength and challenge, discuss ideas and strategies that can help parents achieve their goals, engage in role play or other skill building activities to help parents master core concepts, observe parents as they interact with their child and provide feedback, provide parents with handouts and other relevant materials, and assign skill practice homework to be completed between visits.
